

Traumatic Brain Injury Data Collection

Ohio Profile

Data Collection Information

Injury Core Capacity Development

Ohio is one of 28 states receiving CDC funding to conduct injury surveillance as part of an overall plan for injury control. The general injury data collected for the Core Capacity program examine causes of injury rather than the nature of the injury itself. Ohio is one of 10 Core states that do not yet monitor traumatic brain injury (TBI).

State Injury Indicators Data

Ohio is one of 26 states participating in the Injury Indicators program coordinated by CDC, with input from CSTE and STIPDA. Participating states voluntarily analyze hospitalization and death data to track, monitor, and report on various injuries and risk factors, including TBI. Note that this program uses a restricted definition of TBI.

Program Spotlight

Ohio Valley Center Demonstration Project

The Ohio Valley Center has been conducting demonstration and research projects looking at such TBI-related issues as service coordination, substance abuse, prevention, and services for persons with less severe TBI. Funding for these projects has been obtained through federal sources, such as the National Institute on Disability and Rehabilitation Research (NIDRR) and Center for Substance Abuse Treatment (CSAT), and state sources, such as Columbus Medical Association Foundation and Ohio Rehabilitation Services Commission. For more information, please visit www.ohiovalley.org.
